Global Impex USA

# JULY IS HERE!

# Update from Our Directors.

---

*King Mukherjee & Bob Gazich*

**W**e are deeply saddened and outraged by this decision made this past week on women's rights. The Supreme Court has decided to overturn Roe vs. Wade which in result will leave it up to each state to decide their own laws and opinions on abortion. Global Impex USA stands with women for their right to choose and body autonomy.

**T**he fight for justice continues during this heartbreaking time in the United States.

**King Mukherjee** has had the honor to be invited to represent IFAI at the Innovator Xchange and Innovative Video Showcase Committee. This will be taking place next year from June 8-14. This event only takes place once every four years and is the world's largest textile and garment technology showcase. King will be on the program committee under the theme of Advanced Materials due to being a distinguished member of the textile community.

*Update from  
Our Directors.*

**G**lobal Impex USA has a wide variety of interns for this current Summer Semester. This wide variety includes interns from over 25 different states and countries along with over 40 different universities. Our interns also come from a variety of degrees and progress in their degrees which allows them to combine their diverse educational backgrounds and learning styles. This up and coming group allows this company to expand our viewpoints from experiencing different cultures and lifestyles. Each individual becomes a pivotal component to their team by bringing something new to the table. Broader perspectives and team collaborations are increased due to the exposure to different backgrounds. This also allows our interns to learn about different cultures and customs they may have not been exposed to without this experience. It has amplified our company to the next level and we are excited to see the work this group produces!

# Textile Update

In the world of textile, there have been many changes and updates taking place over the past month. One major update is Industrial Fabrics Association International (IFAI) has now introduced a name change to their company. IFAI now has decided to go by Advanced Textiles Association (ATA). This change was announced to introduce the company's rebranding for its new vision and purpose. This allows them to be more inclusive and represent all textiles and manufacturers.

Along with the name change, ATA is hosting its annual IFAI Expo. This Expo will take place October 12-14 2022 in Charlotte, North Carolina. This expo is the perfect place to find new products, materials, applications, and equipment. This event is a great place to make new connections and help grow your business with many different companies.

Register now and get **\$200** off with the early bird rate!

# Update

## ***Supply Chain & Cotton Inflation***

**N**avigate has shared weekly updates this past month over the news about updates with freights and the effect on supply chains and shipping times. This past month, the ports were a major concern as they were overwhelmed with the influx of a increased amount of ships. This decreased shipping time across the world as the congestion interrupted the normal flow. Due to the delay of ships, many companies turned to trailers as a quick fix. The demand caused a trailer shortage and left many without their normal resources due to delays. As the month came to an end, many ports began to clear up and were given a much needed break. This is caused by the new Ocean Shipping Reform Act to assist in the growth and development of U.S. ports.

# Update

## *Supply Chain & Cotton Inflation*

**P**roducer prices across the board are rising as inflation puts on the pressure. In the United States prices rose at an annual rate of 4.7% last year, which is faster than any of the other countries among the Group of Seven advanced economies, according to the Organization for Economic Cooperation and Development. Many forces affecting inflation, such as supply chain disruptions and damaging weather events, have caused inflation in the US to hit 8.6% last month. The US seems to be faring worse in terms of inflation compared to other parts of the world due in part to high consumer demand.

# GUILD *Update*

**T**hroughout this past month, GUILD APPAREL CO. has continued work on expanding our roster by contacting new clientele and promoting our own. Keep a lookout in this upcoming month for a major announcement coming to Guild Apparel CO as we prepare to go through a major rebranding and name change. Also be on the lookout for a up and coming announcement on a chance to grab one of your favorite NFL player's merch at a pop-up shop!

**A**s sustainability is a major focus in the world, it is also a major focus for us as well. Our material is made from ring spun quaily and is created using water-based sustainable inks in our home state of Minnesota. From our independent brand collection to our well branded tees, our merchandise is made with the highest quality and made to last!
